Hi Ashwin (b) (6)

I would like to understand the team member and their role in both transition and O&M period with you and/or Kishore. Currently, there are **four names** adding into weekly GSA.gov and insite.gsa.gov scrum meetings. From the two meetings that REI joined, OSC group has confused about REI's role and their assigned projects. Please see the list and the questions below.

Ramya Sree Kasibatla - Not sure her role??
Steven Gebremariam - Talked with Steven on Monday, he is assigned to both OGP, USA.gov and GSA.gov as developer. He is not sure whether he will be the key developer for OSC in the future.

Vinayak Gupta - We thought he is assigned to USA.gov only, but we also see he is working on GSA.gov. Will he be focus on USA.gov or GSA.gov?
Ashwin Deshmukh - I think Ashwin is the only person we understand his role and assigned task areas. He assigned as the technical manager role who currently in charge for the transition tasks for both ECAS AWS infrastructure and the applications. Basically everything in ECAS contract ICPW part. He also is our primary POC for both me, Gerard and Henry. Please correct me if I'm wrong.

OSC group currently has the CTAC resources as follows:
     Larissa Khon - Scrum/task/project manager. She also tests the applications while the release the Sprint into Staging and Production. She works with OSC group very closely.
   Dale Fry - Key Drupal and PHP developer. Both front and back end.
   Robert Ashly - Drupal and PHP developer. Both front and back end.

We were waiting for REI tell us who will be the equivalence role as Larissa, so that we can have the better knowledge transfer session with OSC, Larissa and CTAC developer team. Also, as I mentioned in the last email, OSC group requests the key developer and the agile task manager/tester able to work on-site to GSA one to two days per week, especially during the next couple of months transition period. So, please help us to understand the resources plan for OSC.
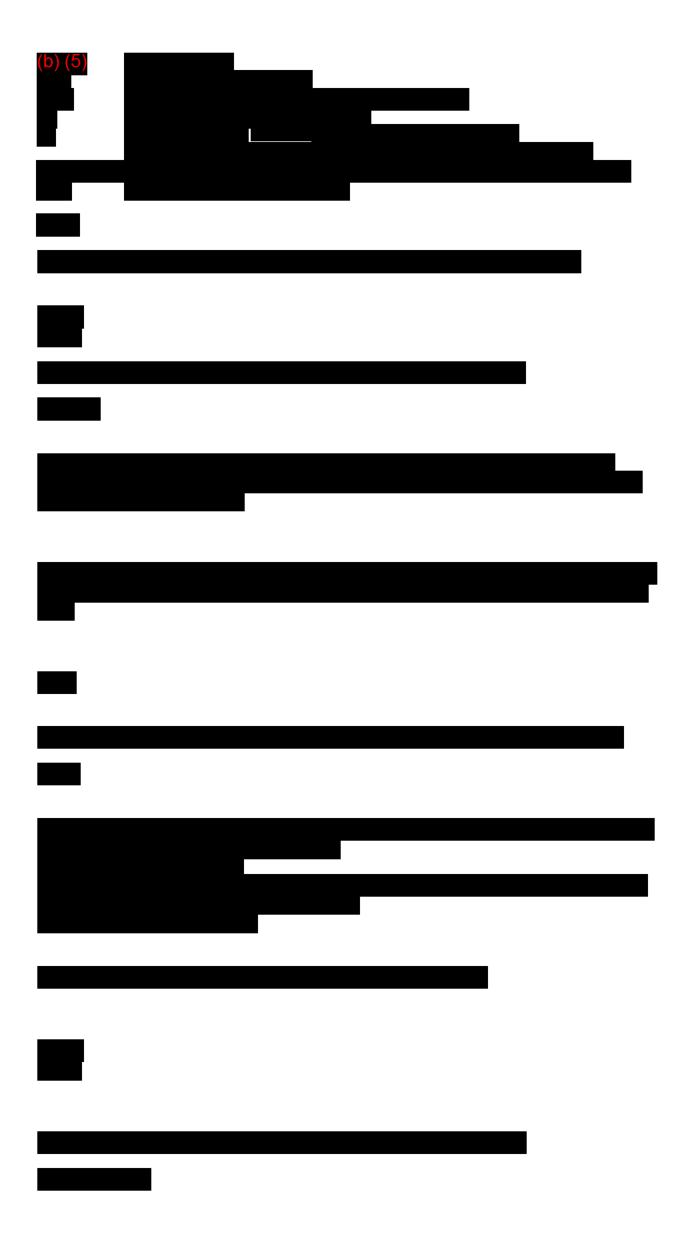

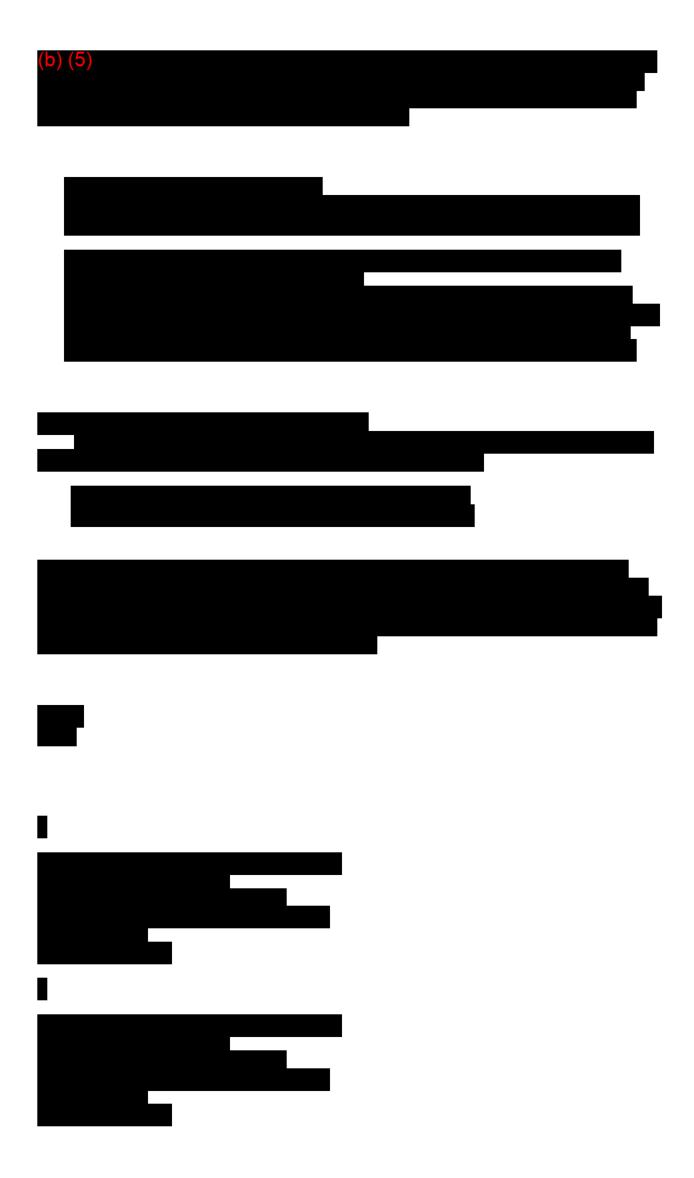

Thanks,
Sherry

Hello Mark and Prerana

GSA.gov and the CMP are transitioning to a new company called REI. The transition will happen in February and final switch will happen in early March.
The CTAC contract ends on March 17.

I wanted to inform you that we will keep the same process as we do now with events. We are in the process of knowledge transfer to REI

Ashwin Deshmukh from REI and I will reach out to you in the coming days. We are looking for smooth transition of the events functionality on GSA.gov

Please let me know if you need any more information.

Hey Boaz,

I am sure on the CMP side the existing team will do the knowledge transfer but I wanted to forward you this document that provides details on the salesforce side. The document is mainly focused on when an event is ready to be published so not really for your team to worry about (it mainly focuses on business process details for NMCD) but we do have a section that provides few details on how the current integration is set up from Salesforce side. A read ahead might be useful before you set up a meeting with us.

Let me know if you have any questions or concerns.

Thanks
